

Attunity Enterprise Manager Service Pack Release Notes for Version 6.5 SP05 (build 6.5.0.427)

These release notes describe the resolved issues and enhancements included in SP05. All service packs are cumulative, including the fixes and enhancements provided in previous service packs.

SP05 (build 6.5.0.427)

This section describes the resolved issues and enhancements in this service pack.

Resolved Issues

Component/Process	Description	Internal Issue #	Customer Case #
Integration with Compose for Data Lakes	AEM would sometimes erroneously send numerous metadata requests to Compose for Data Lakes at the same time, resulting in 100% CPU consumption on the Compose machine.	AEM-6117	1897360
		AEM-6160	1930348
		AEM-6159	1961661

SP04 (build 6.5.0.342)

This section describes the resolved issues and enhancements in this service pack.

Resolved Issues

Component/Process	Description	Internal Issue #	Customer Case #
AEM API	Calling the GetTaskDetails method for Compose tasks would fail with the following error: "This operation is not available for Compose tasks."	AEM-6064	1914582
AEM API	A new "Task" level was added to the structure returned when calling the GetTaskDetails method for Replicate tasks. The new structure impacted automation maintenance. The issue was resolved by reverting the structure to how it was in AEM 6.4.	AEM-6065	1914582

SP03 (build 6.5.0.293)

This section describes the resolved issues and enhancements in this service pack.

Resolved Issues

Component/Process	Description	Internal Issue #	Customer Case #
MongoDB Source Endpoint	Some of the MongoDB endpoint fields were missing from the UI.	AEM-6009	N/A
REST API	The AemGetTaskDetails REST API method would return the same time for AM and PM as it was not in 24 hour format.	AEM-5984	1872774

SP02 (build 6.5.0.275)

This section describes the resolved issues and enhancements in this service pack.

Resolved Issues

Component/Process	Description	Internal Issue #	Customer Case #
Replicate Compatibility	Certified compatibility with Replicate 6.5 SP02.	AEM-6008	N/A

SP01 (build 6.5.0.268)

This section describes the resolved issues and enhancements in this service pack.

Resolved Issues

Component/Process	Description	Internal Issue #	Customer Case #
Replicate Compatibility	Certified compatibility with Replicate 6.5 SP01.	AEM-5989	N/A
AEM Console	When working with Replicate 6.4, AEM would show UI options that were only introduced in Replicate 6.5.	AEM-6004	N/A

Enhancements

Component/Process	Description	Internal Issue #	Customer Case #
Platform Support	Added support for installing AEM on Windows Server 2019 (64-bit).	AEM-6005	N/A
