QlikView® 12.10 SR4 Release notes

What's new in QlikView 12.10 SR4

With the fix for bug QV-9687 it is now required to have a full path for document chaining, only exception is if the documents are in the same folder.

What's new in QlikView 12.10 SR3

QlikView 12.10 SR3 includes only bug fixes.

What's new in QlikView 12.10 SR2

QlikView 12.10 SR2 includes only bug fixes. Release Note is now cumulative and includes bug-fixes for all Service releases on 12.10 track.

What's new in QlikView 12.10 SR1

QlikView 12.10 SR1 includes bug fixes and adds support for NPrinting 17.2.1 or higher.

Known issues

Document Chaining

With fix for bug QV-9687 in SR4 it is now required to have a full path for document chaining, if the documents are not in the same folder.

CAL quarantine period change clarification

The changed quarantine period from 24 hours to 7 days introduced in 12.10 IR applies both to named CALs and Document CALs.

Windows Defender

In Windows Server 2016, Windows Defender might lock QlikView files, we recommend excluding the "C:\ProgramData\QlikTech" folder from Windows Defender scans.

NPrinting 17.x and QlikView 12.10 compatibility

QlikView 12.10 SR1 is now compatible with NPrinting 17.2.1 and above. Container objects are currently not supported in NPrinting templates.

NPrinting add-on

Customers using the NPrinting add-on for on-demand printing, must re-install the add-on when doing an upgrade from 11.20 to 12.10.

Header injection protection

Since QlikView 12.00 SR5, protection against header injection attacks has been available. It is a QlikView Web Server feature, but is disabled by default. To enable it, change the value of the *EnableHeaderChecking* configuration option in *QVWebServer.exe.config* to *TRUE*. This configuration file can be found in *Program Files/QlikView/Server/Web*.
(Note: The pathname stated in the release notes for QlikView 12.10 were incorrect.)

BUG FIXES INCLUDED IN QLIKVIEW 12.10 SR4:
