QlikView

QLIKVIEW FOR MOBILE

OlikView delivers the consumer enterprise with anytime, anywhere access using the world's most popular mobile devices. OlikView for Mobile offers unprecedented freedom from the desktop by delivering dynamic, interactive data analysis when and where people need it. It puts the simplicity and power of OlikView's easy-to-use interactive visual dashboards in the hands of business users anytime, anywhere.

With QlikView for Mobile, we take full advantage of devicespecific features to facilitate data interaction and provide the best end user experience possible. Users get QlikView's data selection, associative search, and advanced visualization capabilities, along with multi-touch, accelerometer, and GPSsensitive filtering for connecting location data to QlikView.

OlikView for Mobile is a free add-on to the OlikView platform, supporting the following popular mobile devices:

- Apple iPad, iPhone, and iPod Touch
- Android devices including Acer Liquid, HTC Hero and HTC Magic, Motorola Droid, Nexus One, Samsung Galaxy, and Sony Ericsson X10
- BlackBerry Bold and BlackBerry Storm

USE QLIKVIEW ANYTIME, ANYWHERE

QlikView's associative, in-memory analysis platform lends itself well to mobile device support. Via mobile devices, QlikView's famous interactivity and ease of use is available to users when and where they need it. Mobile clients connect to a QlikView Server, where all the data is stored that is needed for QlikView analysis. Users can view and interact with charts, graphs, and list boxes anywhere they have Internet access.

ACCESS QLIKVIEW ON THE GO

Extend the reach of your QlikView applications. Deliver sophisticated, real-time business answers to mobile users worldwide. Put the simplicity and power of QlikView's easy-to-use dashboards in the hands of business users on the go.

QlikView

QlikView for Mobile provides anytime, anywhere access

QLIKVIEW TAKES ADVANTAGE OF NATIVE DEVICE CAPABILITIES

QlikView for Mobile extends the simplicity and power of QlikView's easy-to-use visual dashboards with native clients for:

- **Apple iPad, iPhone, and iPod Touch.** QlikView leverages the Apple platform's multitouch and GPS features to deliver QlikView's renowned, industry-defining, associative experience. The result is a groundbreaking BI app that enables freeform exploration of business data without the limits of static reporting. Users can download QlikView for iPad, iPhone, and iPod Touch from iTunes and the App Store.
- **Android devices.** OlikView was the first native BI app released for the Android platform. The Android client takes full advantage of OlikView's intuitive, interactive, and flexible interface. Users can download it from the Android Market.
- **BlackBerry devices.** QlikView for BlackBerry is a fast, flexible Java Virtual Machine designed so even non-touch screen BlackBerry device users can access QlikView's renowned capabilities on the go. Users can download the BlackBerry client from the QlikView download site.
