

# NPRINTING NEW LICENSING OPTIONS

There are four different editions of NPrinting. Features for each edition are listed below. In general:

- the Basic edition is a report viewer; users can run reports which other users have created for them directly from NPrinting or executing from QlikView.
- the Desktop edition is for customers who want many people to be able to execute reports manually.
- the Standard edition is for customers who need to organize lots of different tasks and centralize the execution.
- the Enterprise edition is for customers who need to schedule lots of output and have lots of recipients.

Desktop licenses can be purchased singly only if the customer has a Standard or Enterprise license with a maintenance contract which has not expired. Alternatively, customers must purchase a minimum of three Desktop licenses at a time.

		Basic	Desktop	Standard	Enterprise
<b>View reports</b>	View Excel reports from NPrinting or QlikView.	●	●	●	●
<b>Create formatted professional Excel reports</b>	Create structured Excel reports with data from your QlikView docs. Use Excel charts, formulas, formatting, automation and all Excel features.		●	●	●
<b>Distribute reports to your recipients</b>	Send your reports to your recipients via email or by saving them to recipient-specific directories. Use cycles and filters to send everyone the information they should see. Choose to generate reports in .pdf, .png or .jpg formats if you need static copies or in Excel so that your users can continue to analyze the data.		●	●	●
<b>Automate and schedule repetitive tasks</b>	Simplify your life by automating your tasks using schedules and jobs out of the box without having to write a line of code or macros. Let NPrinting deliver your reports automatically while you focus on more interesting work.			●	●
<b>Simplify recipient management</b>	Import your recipients from databases, LDAP directories and files. Schedule and automatically load new and modified recipients. Automatically associate filters and distribution groups with recipients during import.				●
<b>Secure reporting</b>	Encrypt your reports using OpenPGP: only authorized recipients will be able to open reports.				●
<b>Run in service mode</b>	Let the NPrinting service do the heavy lifting in the most secure environment. Guarantee uptime for your reporting program.				●
