1   QlikView is an in-memory analysis technology; memory requirements for QlikView products are directly related to the quantity of data being analyzed.

2   Third-party security requires QlikView Server Enterprise Edition.

3   Android browser support requires anonymous access to be enabled on the QlikView Server (requires session or usage cal's – not available on a Small Business Edition QlikView server).

    Given the wide variety of Android devices please see QlikCommunity for tested devices and version details.

4   Recommended for development and testing purposes only.

5   QlikView Publisher, QlikView web parts for Microsoft SharePoint®, and QlikView Workbench are additional licensed modules of QlikView Server. They are installed by applying a license to a QlikView Server. QlikView web parts for Microsoft SharePoint® and QlikView Workbench require QlikView Server Enterprise Edition.
