| Service Authentication | | Qlik 🧕 | | | |
| Select the QlikView servers authenticati | on method | | QlikView [.] | | |
| ○ Use digital certificates | | | | | |
| Authenticate communication between QlikView servers using digital certificates and SSL. This alternative is recommended in environments where not all servers have access to a common Windows Active Directory or when the security provided by certificate authentication is required. | | | | | |
| Use QlikView Administrators Group | | | | | |
| Authenticate communication between QlikView services based on membership in the local Windows group QlikViewAdministrators. This alternative can be used in environments where all servers that are part of the QlikView installation can authenticate using a common Windows Active Directory. | | | | | |
