

POWER TOOLS FOR QLIKVIEW

Release notes

May 2018

Information

This is the release notes and change log for Power Tools. They are incrementally updated for each version released.

Version table, 1.3.2

Released: 2018-05-18

Application	Version
QlikView Server Agent *tested*	1.6.2
QlikView Server Super Agent *updated*	1.7.3
QMS API Client	1.1
Qvs Detector	0.9
Qv User Manager	1.0.1
Reload Schedule Migration	1.0.4321
Server Object Handler	2.1
Server Object Handler Batch	2.0
Shared File Viewer	1.5.2
Qv Server Object Connector	1.5.1
XML Db Viewer	1.0.4321
Shared File Repair	1.2

Known issues, 1.3.2

Application	
Qv-user-manager	Does not support pre-10 SR4
Qv Server Object Connector	<ul style="list-style-type: none"> The scan of .shared files performed by the connector is fully recursive on folders and might cause long response times if targeted on document folders that have many .shared files and/or many sub folders with .shared files in them. QlikView Desktop might issue a timeout as a symptom of this scan taking a long time. Consider folder structures and data amounts before running. ObjectTemporary does not signal LASTKNOWNSTATE bookmarks, it will always be "false"
Shared File Repair	Requires 11.20 SR5 or later. The reason for this is because the .shared file verify/repair functionality in 11.20 SR4 was improved in SR5, which made this tool possible to create.

Change log, 1.3.2

Application	
QlikView Server Super Agent	<ul style="list-style-type: none"> Added support for QlikView 12.00, 12.10 and 12.20

Version table, 1.3.1

Released: 2018-05-08

Application	Version
QlikView Server Agent	1.6.2
QlikView Server Super Agent	1.7.2

QMS API Client *updated*	1.1
Qvs Detector *tested*	0.9
Qv User Manager	1.0.1
Reload Schedule Migration *tested*	1.0.4321
Server Object Handler	2.1
Server Object Handler Batch *tested*	2.0
Shared File Viewer	1.5.2
Qv Server Object Connector	1.5.1
XML Db Viewer *tested*	1.0.4321
Shared File Repair	1.2

Known issues, 1.3.1

Application	
Qv-user-manager	Does not support pre-10 SR4
Qv Server Object Connector	<ul style="list-style-type: none"> The scan of .shared files performed by the connector is fully recursive on folders and might cause long response times if targeted on document folders that have many .shared files and/or many sub folders with .shared files in them. QlikView Desktop might issue a timeout as a symptom of this scan taking a long time. Consider folder structures and data amounts before running. ObjectTemporary does not signal LASTKNOWNSTATE bookmarks, it will always be "false"
Shared File Repair	Requires 11.20 SR5 or later. The reason for this is because the .shared file verify/repair functionality in

	11.20 SR4 was improved in SR5, which made this tool possible to create.
--	---

Change log, 1.3.1

Application	
QMClient	<ul style="list-style-type: none">Added support for QlikView 12.00, 12.10 and 12.20 (up to SR4)Minor UI change for service version labelsTested for QlikView 12.X support (supported)
Server Object Handler Batch	<ul style="list-style-type: none">Tested for QlikView 12.X support (supported)
XMLDBViewer	<ul style="list-style-type: none">Tested for QlikView 12.X support (supported)
Reload Schedule Migration	<ul style="list-style-type: none">Tested for QlikView 12.X support (not supported, will not be supported)
QvsDetector	<ul style="list-style-type: none">Tested for QlikView 12.X support (supported)

Version table, 1.3.0

Released: 2018-05-04

Application	Version
QlikView Server Agent	1.6.2
QlikView Server Super Agent	1.7.2
QMS API Client	1.0
Qvs Detector	0.9
Qv User Manager	1.0.1
Reload Schedule Migration	1.0.4321

Server Object Handler *updated*	2.1
Server Object Handler Batch	2.0
Shared File Viewer	1.5.2
Qv Server Object Connector *updated*	1.5.1
XML Db Viewer	1.0.4321
Shared File Repair	1.2

Known issues, 1.3.0

Application	
Qv-user-manager	Does not support pre-10 SR4
Qv Server Object Connector	<ul style="list-style-type: none"> The scan of .shared files performed by the connector is fully recursive on folders and might cause long response times if targeted on document folders that have many .shared files and/or many sub folders with .shared files in them. QlikView Desktop might issue a timeout as a symptom of this scan taking a long time. Consider folder structures and data amounts before running. Shared File Repair	Requires 11.20 SR5 or later. The reason for this is because the .shared file verify/repair functionality in 11.20 SR4 was improved in SR5, which made this tool possible to create.

Change log, 1.3.0

Application	

Server Object Handler	<ul style="list-style-type: none"> Requires .NET Framework 4.0 Support for QlikView 12.X (or rather; removed limitation)
Qv Server Object Connector	<ul style="list-style-type: none"> Added support to read Bookmarks and associated variables and values

Version table, 1.2

Released: 2014-02-20

Application	Version
QlikView Server Agent *updated*	1.6.2
QlikView Server Super Agent *updated*	1.7.2
QMS API Client	1.0
Qvs Detector	0.9
Qv User Manager *updated*	1.0.1
Reload Schedule Migration	1.0.4321
Server Object Handler *updated*	2.0
Server Object Handler Batch *updated*	2.0
Shared File Viewer *updated*	1.5.2
Qv Server Object Connector *updated*	1.5
XML Db Viewer	1.0.4321
Shared File Repair *new* *updated*	1.2

Known issues, 1.2

Application	
Qv-user-manager	Does not support pre-10 SR4
Qv Server Object Connector	<ul style="list-style-type: none"> The scan of .shared files performed by the connector is fully recursive on folders and might cause long response times if targeted on document folders that have many .shared files and/or many sub folders with .shared files in them. QlikView Desktop might issue a timeout as a symptom of this scan taking a long time. Consider folder structures and data amounts before running. ObjectTemporary does not signal LASTKNOWNSTATE bookmarks, it will always be "false"
Shared File Repair	Requires 11.20 SR5. The reason for this is because the .shared file verify/repair functionality in 11.20 SR4 was improved in SR5, which made this tool possible to create.

Change log, 1.2

Application	
Shared File Repair	<ul style="list-style-type: none"> Fix for error "The path is not of a legal form" when searching for Qvs binary Fixed fonts Added "Don't show this again" checkbox for startup notice
Server Object Handler	<ul style="list-style-type: none"> Requires .NET Framework 3.5 New filters: <ul style="list-style-type: none"> Objects owned by users not in Active Directory Objects owned by users not enabled in Active Directory Improved performance New progress bar Real-time updating log console in separate window Version check of server binary Minor interface updates
Server Object Handler Batch	<ul style="list-style-type: none"> Requires .NET Framework 3.5 New filters: <ul style="list-style-type: none"> Objects owned by users not in Active

	<ul style="list-style-type: none"> Directory <ul style="list-style-type: none"> ○ Objects owned by users not enabled in Active Directory
Shared File Viewer	<ul style="list-style-type: none"> • Added right-click menu option on object ID in main view to open Bitmap with a certain object's block selected • Added blue as color for selected object in Bitmap view • Added legend in Bitmap view colors • Changed visual representation of "removed" block in Bitmap view from red strikethrough to full red block • Fixed render bug in Bitmap view • Added "Sheet objects" option under the View menu – renders a visual view of objects (size and location) on a sheet grid for any selected user and sheet • Extended filters
QlikView Server Super Agent	<ul style="list-style-type: none"> • Added username, password and SSL support for SMTP notifications • Minor fixes
QlikView Server Agent	<ul style="list-style-type: none"> • Added "Restart all" option • Stability fixes
Qv Server Object Connector	<ul style="list-style-type: none"> • Added field "BookmarkFieldBookmarkName" to extract name of bookmark • Added table Dimensions – contains all found dimensions for chart objects (if any) • Fixed glitch in ObjectShared and ObjectHidden values, they now show correct • Added field BookmarkFieldBookmarkName – this gives you the bookmark name • Added table ObjectsAccessList – contains the users in the access list for any given object (if there are any). Mostly interesting for Annotation objects • Fixed bug where files named "File.qvw - Copy.shared" was not picked up by the connector. Connector now looks for *.shared, and not *.qvw.shared

Version table, 1.1

Released: 2012-04-19

Application	Version
QlikView Server Agent *updated*	1.4.1

QlikView Server Super Agent *new*	1.6
QMS API Client	1.0
Qvs Detector	0.9
Qv User Manager *updated*	1.0.1
Reload Schedule Migration	1.0.4321
Server Object Handler *updated*	1.2
Server Object Handler Batch	1.0
Shared File Viewer *updated*	1.2
Qv Server Object Connector *new*	1.2
XML Db Viewer	1.0.4321

Known issues, 1.1

Application	
Qv-user-manager	Does not support pre-10 SR4
QvServerObjectConnector	The scan of .shared files performed by the connector is fully recursive on folders and might cause long response times if targeted on document folders that have many .shared files and/or many sub folders with .shared files in them. QlikView Desktop might issue a timeout as a symptom of this scan taking a long time. Consider folder structures and data amounts before running.

Change log, 1.1

Application	
Qv-user-manager	Fixed 10/11 compatibility issue, now works with 10 SR4 and later, and 11 IR and later.
SharedFileViewer	Added filtering in GUI on ID, Type, User and Temporary Bookmarks. Added select/deselect and invert selection options
SharedFileViewer	Added "Reload" option in File menu to refresh file from disk
SharedFileViewer	Fixed double-click will deselect object on ID column
SharedFileViewer	Added command line argument support to batch exports of bookmarks and objects without using GUI
SharedFileViewer	Improved performance on list for marked objects and "Color on top" option
SharedFileViewer	Added Length and Offset meta data for all objects in "Export to XML" functionality (not Bookmark export)
ServerObjectHandler	Improved the ordering of document list
ServerObjectHandler	Added filter functionality on document list
ServerObjectHandler	Added sorting functionality on all columns in object list
QlikView Server Agent	Fixed bug that discarded initial command line server name (to 1.4.1)
QlikView Server Agent	Added command line argument support to initialize connection to any host on startup
QlikView Server Agent	Increased the time interval on which services gets polled - helped symptoms where connecting remotely lagged application
QlikView Server Agent	Added settings tab for check interval & default settings
QlikView Server Agent	Added "Default server" functionality

QlikView Server Agent	Moved the remote server option to main GUI, moved the credentials option to main GUI, added a dropdown list of recent servers accessed, added a "Restart all" option
QlikView Server Super Agent	Added to Power Tools!
QlikView Server Super Agent	Added support to add multiple services to a group
QlikView Server Super Agent	Fixed bug in check timer, real milliseconds is now recorded in logs
QlikView Server Super Agent	Added option to rename groups and services in tree
QlikView Server Super Agent	Added configuration location link in settings form
QlikView Server Super Agent	Added service URI for each downed service in notification email
QlikView Server Super Agent	Fixed bug that intermittently blanked group and service names in tree
QvServerObjectConnector	Added to Power Tools!

Version table, 1.0

Released: 2011-12-07

Application	Version
QlikView Server Agent	1.1
QMS API Client	1.0
QvsDetector	0.9
Qv User Manager	1.0
Reload Schedule Migration	1.0.4321

Server Object Handler	1.0
Server Object Handler Batch	1.0
Shared File Viewer	0.7
XMLDbViewer	1.0.4321

Known issues, 1.0

Application	
Qv-user-manager	Not compatible with QlikView Server 10 SR4 or 11 IR
QlikView Server Agent	High CPU usage when operating on remote services
