- Idevio
- GeoMarket Solutions

Maps in QlikView?

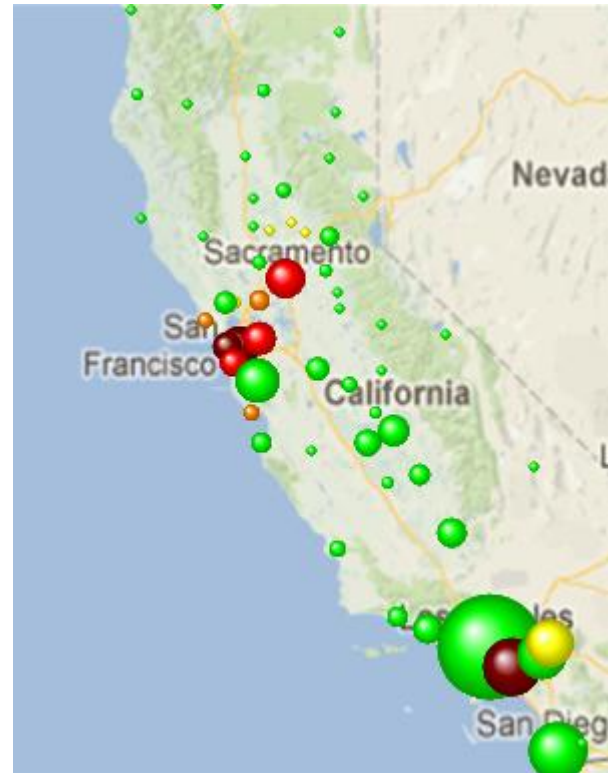

No such thing as a
“map” object

Combine Scatter Chart with Map API

Place dots on a map

**Requires finding
latitude & longitude
for data points**

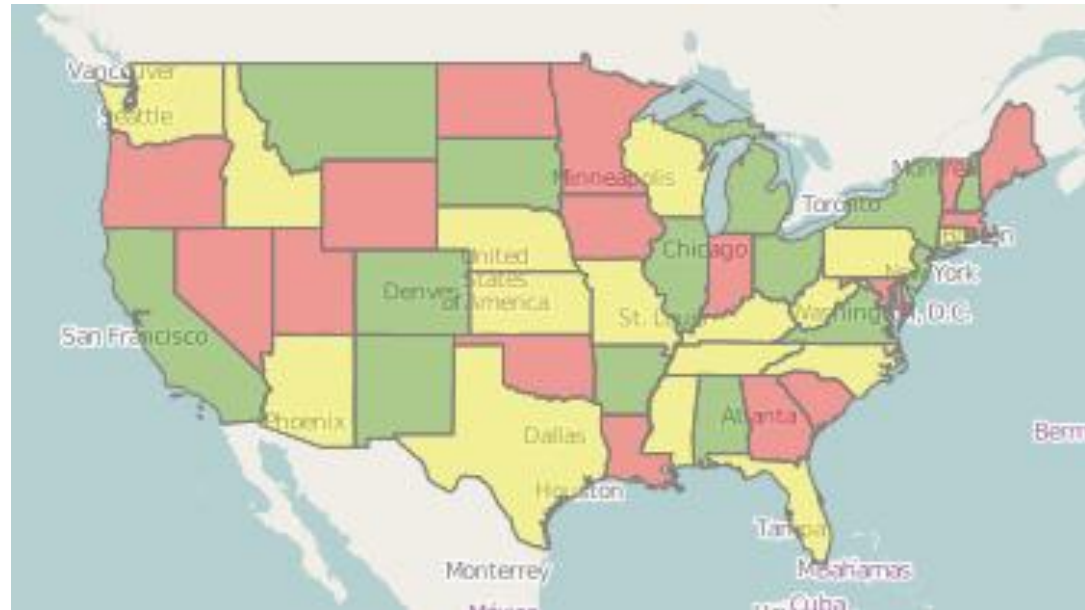

Google Maps

Free QlikView Extensions

Use open source
extensions

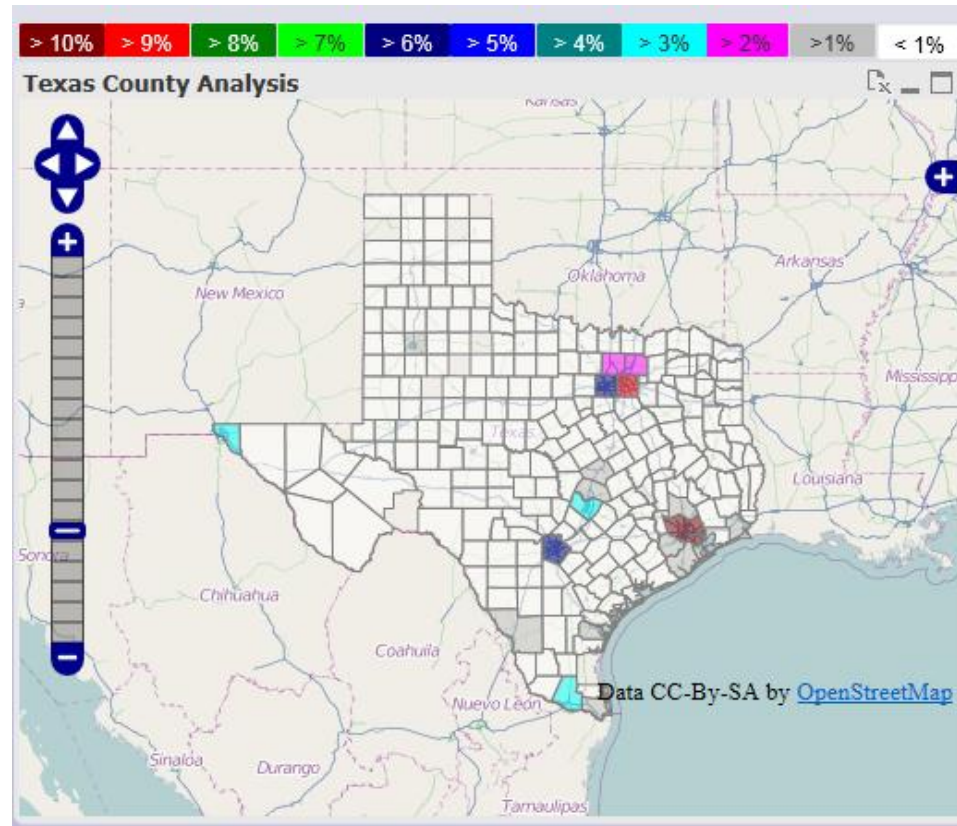

... or write your own

Brian Munz at QlikTech, using OpenStreetMaps

Free QlikView Extensions

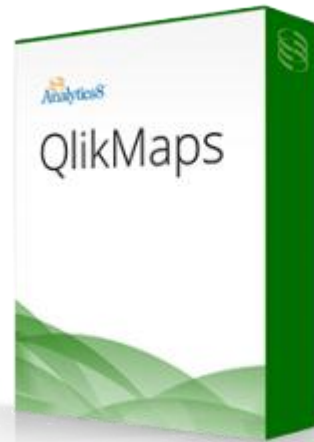

Going beyond
Country/State level
Requires finding and
manipulating
KML/XML files

Mike Strube at GeoMarket Solutions, using OpenStreetMaps

Purchase QlikView Extensions
