

The screenshot shows the QlikView Management Console interface. The browser address bar displays `http://localhost:4780/qmc/SystemSetup.ht`. The application has tabs for Status, Documents, Users, and System. The System tab is active, showing a navigation pane on the left with a tree view containing Management Service, QlikView Servers, Directory Service Connectors, QlikView Web Servers, QVWS@buchsvapp04 (selected), and Mail Server. The main content area has sub-tabs for Summary, General, and Login. The Summary tab is selected, showing configuration fields for Location (Name: QVWS@buchsvapp04, Url: http://buchsvapp04:4750/QVWS/Service), Logging Level (Low, Medium, High selected), Enable Utilization logging (unchecked), Communication (Port: 80, Use https unchecked), and Directory Service Connectors (Name). A modal dialog box titled "Message from webpage" is overlaid on the screen, displaying a warning icon and the text "No such host is known" with an OK button. At the bottom right of the application window are Apply and Cancel buttons.
