

Hello,

has anyone seen this msg when trying to get data from the Salesforce SOAP service inside Talend ESB?

Caused by: javax.net.ssl.SSLHandshakeException: SSLHandshakeException invoking <https://test.salesforce.com/services/Soap/c/26.0>: sun.security.validator.ValidatorException: No trusted certificate found

The ESB server is version 5.1.1: TESB_SE-V5.1.1

I'm using the current latest version of the SF API: 26.0

I also have a main method for testing in one class, that has no trouble connecting to Salesforce when I run it using Maven, outside of the ESB server.

full stack trace:
