```

These pages showed up yesterday, so I'm not sure why this error is appearing today. I tried restarting the webserver and I've checked the catalina files after that which are attached. There seems to be a lot of "SEVERE" errors, but googling around has told me that they shouldn't affect anything. If anyone has seen this before or is much more familiar with Tomcat logs than I am, it would be very helpful to diagnose the issue. Thanks!
