

Hi everyone,

I have been spending a lot of time on this but no luck yet.

I have a simple job with one tJava component that is printing a message(no context variables or anything). I publish this to cloud and when I run I I get the below message

Failed2019-07-18 18:36:58

Task 5d30f35619410b4405f79050/1.1 failed unexpectedly.

org.talend.ipaas.rt.flow.controller.impl.FlowExecutionException: Step 7c977ce8-3966-4164-aab8-87af56118055 failed with code -1 and error Error resolving artifact actions:test roperties:0.1.0:

... 8 more
```

Does anyone have any clue what could be wrong here? I created a new project in studio and exported, changed the management console account but nothing works.. I'm so clueless

I can see the artifact for the job under configuration.

Can someone please help me as this is an urgent requirement

thanks in advance
