

Hi,

Since 2 days, I wish activate AMC database on my Job.

In TOS, I configurated my project settings to define AMC parameter database.

In TOS environnement, my job works fine. I can see data in my AMC database.

However, when i deployed and executed my job in KARAF, I got this error message:

Error Invalid or Stale Connection found in the Connection

org.springframework.jdbcCannotGetJdbcConnectionException: Could not get JDBC Connection; nested exception is java.sql.SQLException: Closed Connection:

OraclePooledConnection.getConnection() - SQLException Occurred:Invalid or Stale Connection found in the Connection Cache

```

Do you know reason for this error?

Best Regards

TALENT Anthony
