

Hi,

I am using Tlaend Open Studio for ESB 6.1.0. I have a mediation route which does xsl transformations. When I run that from studio, it runs fine but when it is deployed in runtime, it throws error as "javax.xml.transform.TransformerException: "abc" attribute is not allowed on the "Operation" element!"

It seems related to allowing foreign attributes but how it makes difference from studio and runtime. Also how to fix this ?

Thanks in advance!

```
javax.xml.transform.TransformerException: "abc" attribute is not allowed on the Operation element!
