

I made a job in 3.0 that works fine (3rd and 4th pics). When I mimicked that job set up in 2.4.1 (1st and 2nd pics), the tDenormalize did not behave as expected. in 3.0.0, this was the output of tDenormalize (which is what I want it to look like)

ID\_BB\_COMPANY|LONG\_COMP\_NAME|COUNTRY\_ISO|SHORT\_NAME|SECURITY\_TYP|MARKET\_SECTOR\_DES|QUOTE\_TYP|DAY\_CNT|PAR\_AMT|MTG\_FIRST\_PAY\_DT|CPN|MTG\_C

but in 2.4.1, this was the output of tDenormalize
