

## MDM 6.1.1

When defining an entity action process that calls a job, I am receiving the following error when executing from the MDM Web UI;

### **ERROR Could not execute the tisCall transformer plugin for job**

Steps to reproduce:

Create a new DI job using tMDMReceive component and context variable for the XML Record field.

Deploy job on MDM server. Test execution of job from Studio works as expected.

Create a new Entity Action Process from the MDM perspective in Studio that uses the callJob plugin. Deploy this to the MDM Server.

Screen shots of job and all process step definitions are attached.

### Full MDM Log Error:

2016-03-18 11:23:30,736 INFO Invoking job 'Runnable\_MotorSystem\_Main\_0.1'

2016-03-18 11:23:30,736 ERROR Could not execute the tisCall transformer plugin for job Runnable\_MotorSystem\_Main in version 0.1
