

Hello,

I am trying to launch Talend Open Studio for ESB for the first time, and it keeps failing and giving me the message: "An error has occurred. Please see the log file null."

The log files were actually being stored in the configuration directory, and you'll find one of them copied below.

I installed on my machine just yesterday a trial of Talend Studio (Data Integration) and all was working well. I realized it wasn't the product I needed so I downloaded Talend Open Studio for ESB and I really need it to launch.

Any suggestions?

I am using Windows 10 64 bits, jre1.8.0_92 (all older versions have been uninstalled), and Talend Open Studio for ESB 6.2.1.

Thanks,

Rita.

```
