

Last night, I started seeing this error while POSTING data to a RESTful service via TESB open studio 6.3.1 deployed in Karaf Runtime container. I am accepting requests via tRestRequest in the job and deployed the .kar file on the runtime environment.

I have never seen this before and I have no clue how to address it. is it a server side/ client side error?

One thing I did is reduce the data being posted, and this error went away.  
I don't remember the exact size of the data posted.

I have a SAM feature running saving data in SQLSERVER DB.

My version is TESB Open - 6.3.1. Any comments/ feedback appreciated.
