

Hi,

I have create a report using JasperSoft Studio. Basically I am connecting to SQL server and fetching records from there to create a report. This works perfectly in jaspersoft studio. But when I use this same JRXML file in Talend tJasperOutput component it gives me the below error (I am using Jasper Soft Studio version 6.0.3 and Talend Open studio version 5.6.1 and SQL server 2012.):

Starting job Jasper_Talend_all_Char at 20:13 29/04/2015.

connecting to socket on port 3344

connected

Job Jasper_Talend_all_Char ended at 20:13 29/04/2015.

I am using Jasper Soft Studio version 6.0.3 and Talend Open studio version 5.6.1 and SQL server 2012. Is this a compatibility issue or am I doing something wrong?

I am attaching my JRXML file, backup of the SQL server table and Talend Job here.

Any help will be appreciated.
