

Hi,

We've got an issue regarding deploying a route on our Talend Runtime server.

Current server versions:

Talend Studio used : 7.2.1

Nexus repository : 3.18

Talend Runtime: 6.2.1

We cannot deploy a new route, published from Talend Studio on the runtime server.

```

snapshot is present. To be honest I don't really understand why the runtime won't pick up the route. With previously published routes from Nexus 2.14 works just fine.

Kind regards,

PS. I've tried this as well :

<https://community.talend.com/t5/Migration-Configuration-and/Route-cannot-be-deployed-on-ESB-Runtime-server/ta-p/49146>

<https://community.talend.com/t5/Migration-Configuration-and/Error-while-deploying-route-service-to-runtime-from-TAC/ta-p/40570>

It doesn't want to work. Is it possible that Talend Runtime 6.2.1 is not compatible with Nexus 3.18?
