

I'm using JDK 1.8.

I have included the log file directly in the message here. The message has changed slightly between 6.0 and 6.0.1, but the one error is still occurring: org.osgi.framework.BundleException:

Could not resolve module: org.eclipse.jdt.launching.macosx. Not sure why macosx is part of this, I'm running on Windows 7.

Thank you!

Carl.
