

I'm working so long on that setup that I start being disregarding ;-). This was actually the problem. After that, I got some other issues, but these were caused by a missing portmapping (8090) or wrong TAC credentials. Now, it seems to almost work. I can add campaigns or data models. Only when I get to "Semantic Types", I get the following issue:

Spoiler (Highlight to read)

```

I will further analyze that issue by myself as I think I could have missed something in the documentation. I just wanted to give you an update already. Thanks!

Edit: For DataPrep, the issue is still there but I will check if any of the TDS issues might also be the case for DataPrep.
