

I tried with version jdk6u32, jdk6u25, jdk6u11 and always the same. I get this error: Caused by: java.lang.NoClassDefFoundError: Could not initialize class org.fusesource.jansi.internal.Kernel32

At the end of this message you can find the container/log/tesb.txt

I tried also Talend ESB 5.0.3 and got finally the karaf console but, before the karaf command prompt there was a message:

Using an unsupported terminal: java.lang.NoClassDefFoundError: Could not initialize class org.fusesource.jansi.internal.Kernel32

Any suggestion?

Thankyou very much.
