

Hello Sabrina,

I found my logs at this path \Talend\5.2.2\tac\apache-tomcat\logs, but this seems not having any TAC related logs as these logs doesn't have any error messages that I raised above and also that's showing on TAC. The only log with today's timestamp I found is "localhost.2013-09-13" and I see catalina log file for yesterday with the name "catalina.2013-09-11". I am including the screenshot of TAC error message which is showing on clientlog tab on TAC, do you know where does TAC source this log from?
localhost.2013-09-13
