

Hello, I'm trying to install Talend Open Studio for Data Integration, but some errors occur.

Talend Open Studio for Data Integration: TOS_DI-20200219_1130-V7.3.1

Java version: jdk1.8.0_241, no jre installed

OS: Windows 10, 64 bits

Environment variables:

-JAVA_HOME = C:\Program Files\Java\jdk1.8.0_241

-Path contains C:\Program Files\Java\jdk1.8.0_241

I've already spent a lot of time on the community. I've read the following topics, but I still have the errors

- <https://community.talend.com/t5/Installing-and-Upgrading/Not-able-to-open-Talend-Studio-6-2-1-with-error-module-org/m-p/52097#M2121>

- <https://community.talend.com/t5/Installing-and-Upgrading/First-time-starting-Talend-Open-Studio-for-Data-Integration-on/td-p/201708>

- Jira issue (still open??) <https://jira.talendforge.org/browse/TUP-2630>

I'm still blocked. If I can't test the open source version, I'm not going to look for the upgraded version for my professional project.
