QlikView® 11.20 SR15 – Release notes

Bug fixes

QlikView 11.20 SR15 comes with a fix for the issues described below.

It is not possible to disable session recovery

Jira issue ID: QVII-1215

Description: It is not possible to disable session recovery. As a result, the QMS times out and causes AJAX performance issues.

Open URL action changes upper case values to lower case in QlikView 11.20 SR14

Jira issue ID: QVII-1182

Description: Using the Open URL action causes upper case values to be changed to lower case values. This bug is specific to QlikView 11.20 SR14 and does not appear in previous versions.

QlikView Server continuously restarts after upgrading to QlikView 11.20 SR14

Jira issue ID: QVII-1129

Description: After upgrading to QlikView 11.20 SR14, the QlikView Server restarts every few seconds.
